

Decentralized OTC

AirCash

Meet the partners >>>

Buy and sell crypto with fiat money in a decentralized way.

AirCash is the first and largest decentralized OTC platform in the galaxy.

Connect Wallet

We made the difference.

Easy to Use

Buy and sell crypto with fiat money in your wallet.

No Identity Verification

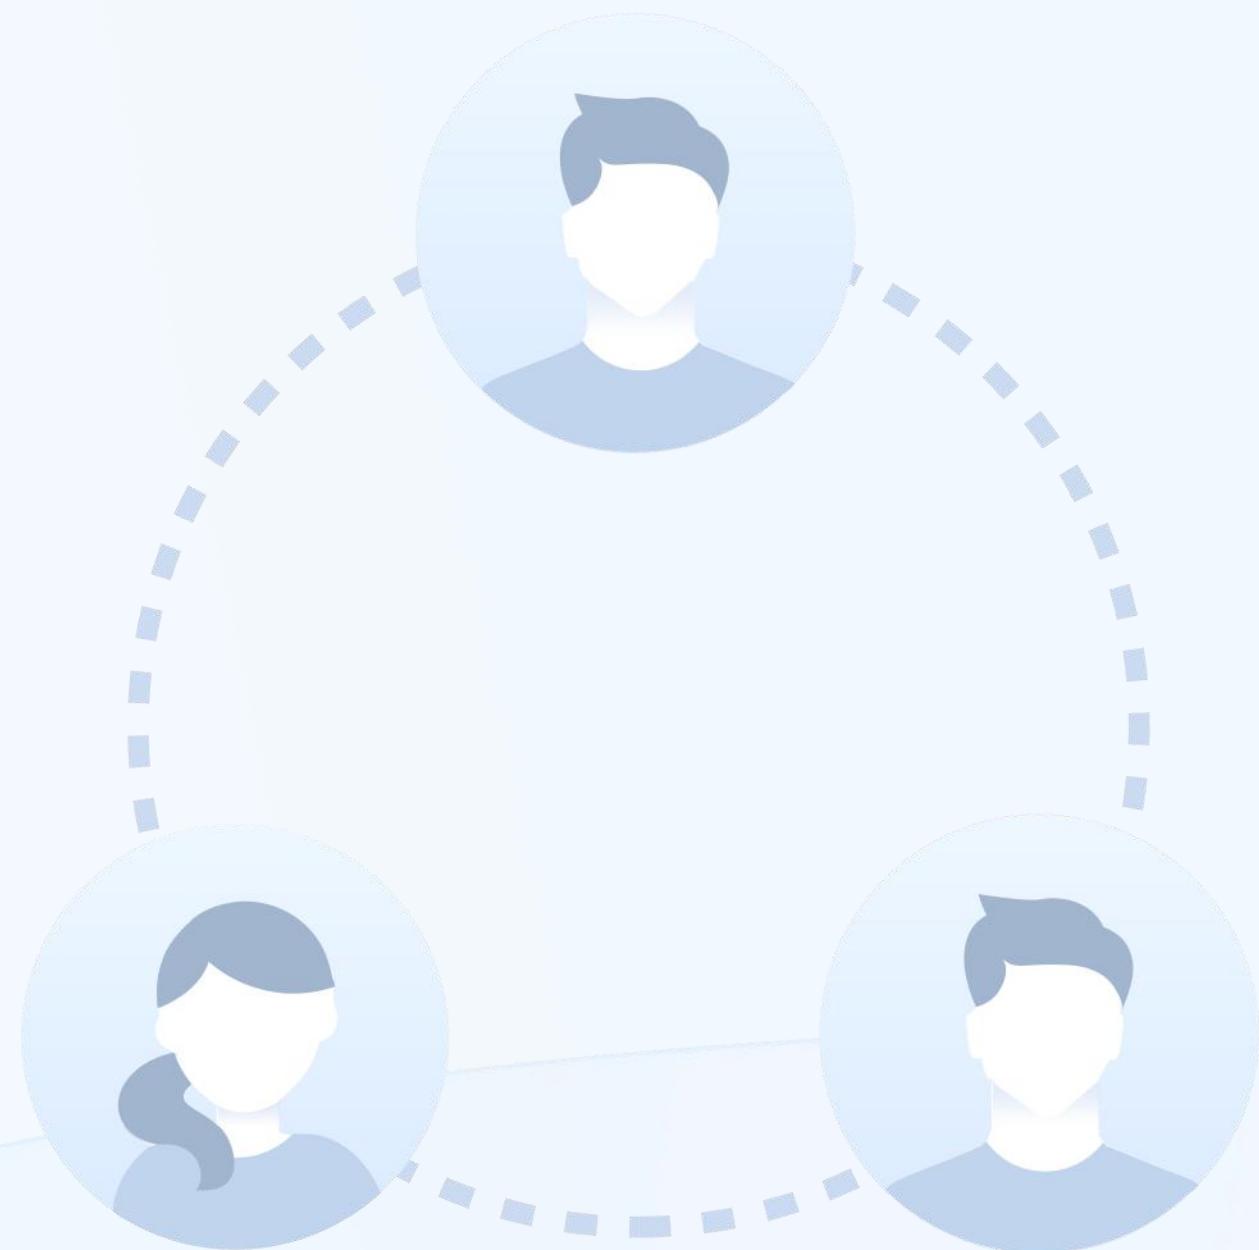

No KYC, accounts, and personal information anymore

What's AirCash

AirCash is the first and largest decentralized P2P trading platform in the galaxy.

Buy and sell crypto with fiat money in a decentralized way.

What's the problem

It's ridiculous that we all need KYC to do anything in Crypto.

It's ridiculous that we all need a centralized crypto exchange for cash in and out.

Why AirCash

Easy to Use

Buy and sell crypto with fiat money in your wallet.

You don't need any exchange anymore.

Secure & anonymous

Traders get in touch through a peer-to-peer messenger.

No one knows the details of your trading.

No Identity Verification

No KYC, No accounts, and No personal information anymore.

You can buy and sell anonymously.

Decentralized

All trading takes place on the blockchain.

We have built a DAO for decentralized governance.

What's the nomic

AIR is the ECO token of the AirCash system.

1. AIR token

- **10,000 trillion** AIR hard cap.
- **9,555 trillion** AIR burnt.
- **50 trillion** AIR and 200 BNB are added for PancakeSwap liquidity.
- **395 trillion** AIR was locked by an AIRNFTmining smart contract.

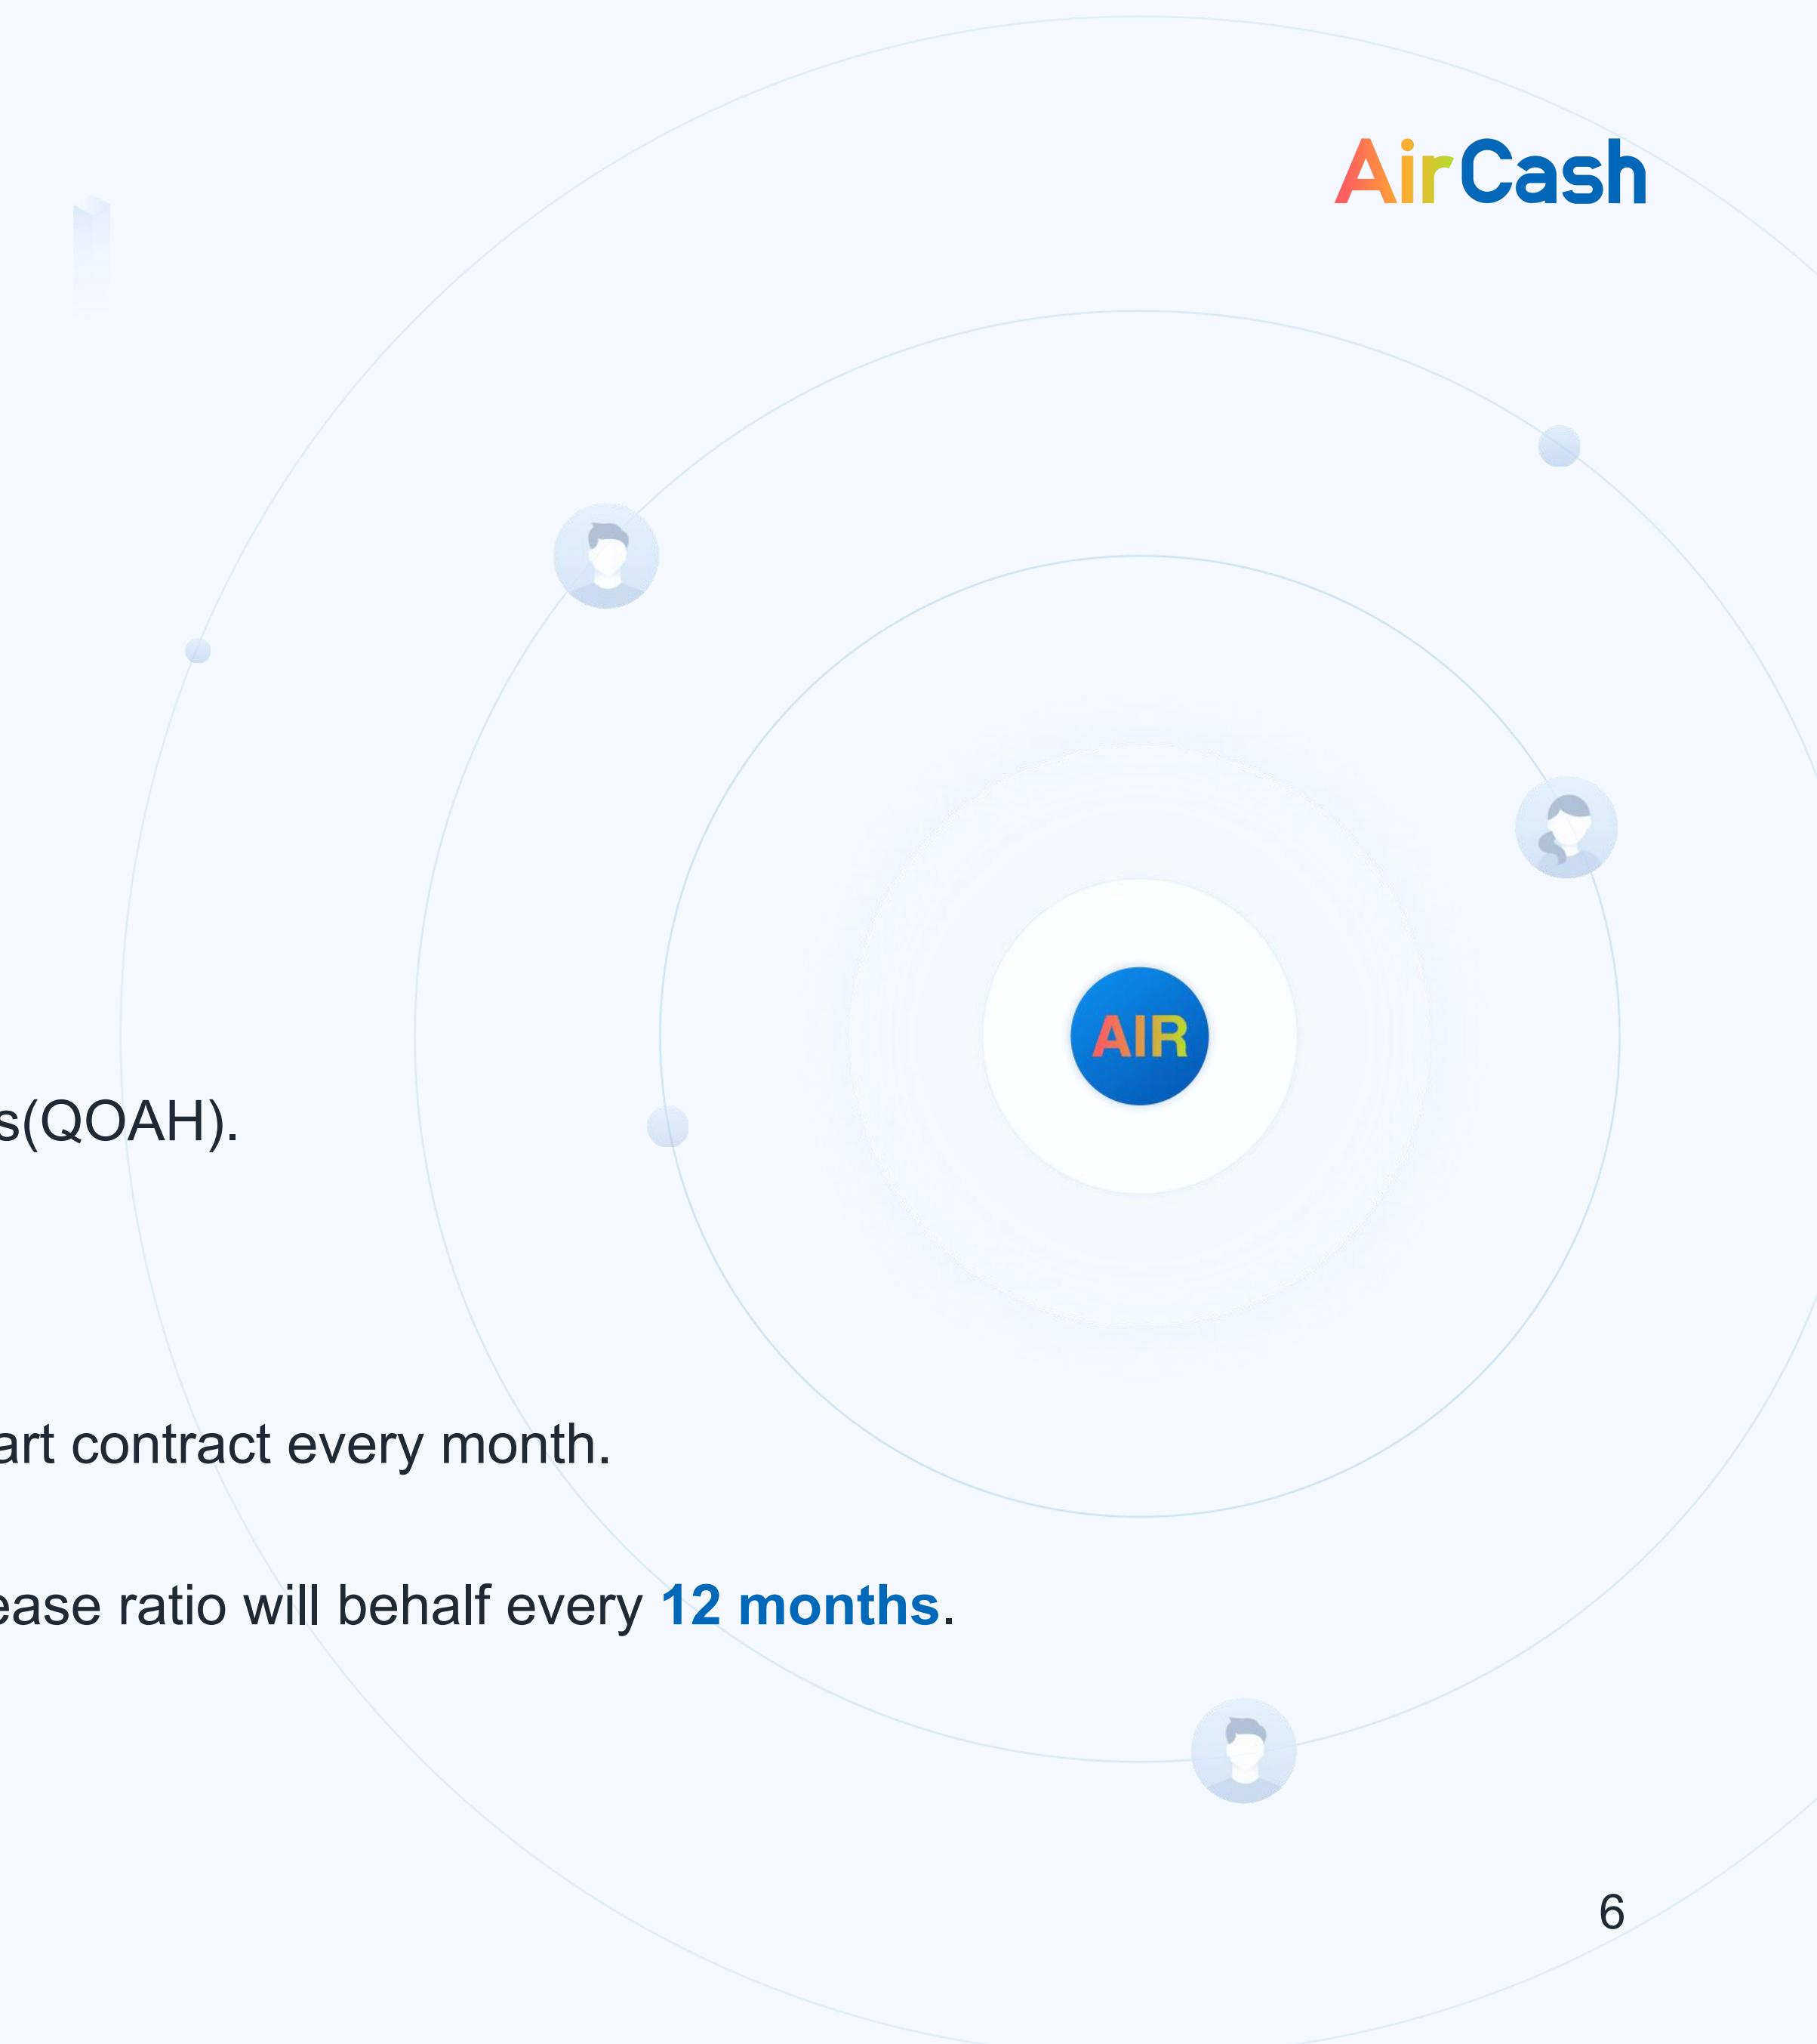

What's the nomic

AIR is the ECO token of the AirCash system.

2. AIRNFT mining

-
- **395 trillion AIR** was to be distributed to the Qualified Old AIR Holders(QOAH).
- Every QOAH will receive an **NFT**.
- Every QOAH can claim less than **1% AIR** from an AIRNFTmining smart contract every month.
- The release ratio of the first **12 months** is 1% per month, and the release ratio will behalf every **12 months**.
- The final circulating supply will be less than **450 trillion**.

Safety

Audit

AirCash's smart contract will be audited by Certik and SlowMist.

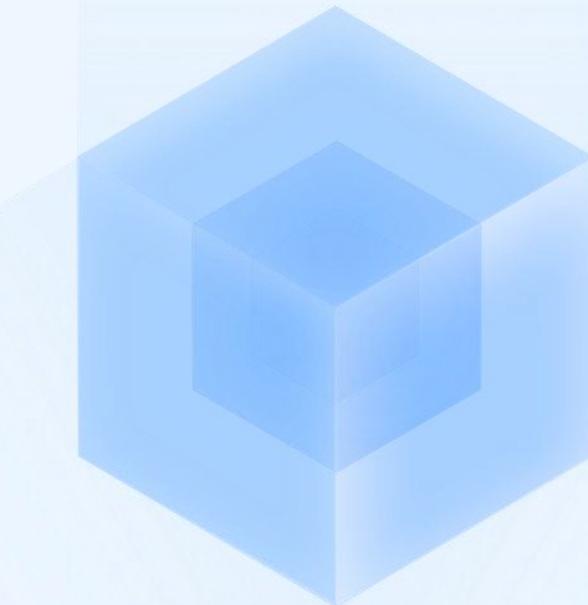

Certik: <https://www.certik.com>

SlowMist: <https://www.slowmist.com>

Security & Privacy

Traders get in touch through a peer-to-peer messenger.

No one knows the details of your trading except yourself.

No super admin key

The assets are fully locked with the smart contract.

There is no super admin key, and no one can take away the assets in the smart contract.

Decentralized governance

v Merchant

- Merchants need to lock 10 billion AIR.
- The merchant is the liquidity provider of the system.

Witnesses

- Witnesses need to lock 100 billion AIR and pass the assessment.
- The witness needs to deal with the appeal.
- For each appeal, the witness can get 1 USDT or 1 million AIR.

Decentralized governance

Members of Congress

- Congress Members need to lock more than 1,000 billion AIR and pass the assessment.
- When someone disagrees with the judgment of the witness, they can appeal to congress, and the congress members need to make the final judgment.
- For each appeal, the Congress member can get 10 USDT or 10 million AIR.

DAO and the referendum

- AIR holders need to elect 5 congress emembers every 6 month.

AirCoin Labs

AirCoin Labs is a decentralized autonomous Organisation.

We have built ACG Ventures, AIR token, AIRNFT, and AirCash.

ACG Ventures

ACG Ventures is DAO-based venture capital.

More Info

AIR Token

AIR was issued to mock the madness of the cryptocurrency market.

If you buy AirCoin, you get nothing but AIR.

AIRNFT

AIRNFT is an asset-based NFT project.

You can claim AIR tokens from a mining contract with your AIRNFT.

AirCash

AirCash is the first and largest P2P crypto trading platform.
